Kansas City, KS (NOVEMBER 2007) Global Tank Leasing is pleased to announce the addition of FRAC Tank containers to their existing fleet of liquid tank storage and transport solutions.

Single axle mobile FRAC tanks are available for the storage of various chemicals, waste water, and other liquid containment needs. FRAC tanks feature 500 barrel / 21,000 gallon capacities with epoxy linings. All units have 22" dome lids at the front, side and top of the tank with 4" butterfly valves in the front and rear making these storage tanks ideal for plant storage, pipeline projects and oil field applications. With this addition Global Tank Leasing will be able to better supply their customers with the most comprehensive and innovative tanks in the industry.

About Global Tank Leasing

Global Tank Leasing is a premier ISO, FRAC and tank trailer leasing and sales company specializing in state-of-the-art tank transport and storage solutions for multiple industries including: chemical, manufacturing, refining operations, construction, municipal, and industrial services.
