**Kansas City, KS (July 21 2008)** Global Tank is pleased to announce the opening of a new Texas field office located in the Barnett Shale in Alvarado, TX. The Barnett Shale office will allow Global Tank to further expand services to the natural gas and oil exploration and pumping industries.

“We are very excited to be opening an office in the Barnett Shale; the Barnett Shale is thought to be one of the world’s largest onshore natural gas fields as well as hold substantial oil reserves. This field office will allow Global Tank to meet our customers growing needs in this industry and region” said President James Stinson.

The Barnett Shale office will supply Global Tank customers with FRAC Tanks, Jet Line Mud Tanks, Diesel and Electric Pumps, Vacuum Boxes, Vacuum Tanks, Tank Trailers and the services associated with the use of this equipment in the exploration and pumping of natural gas and oil.

### **About Global Tank**

Global Tank is a premier liquid containment rental company specializing in state-of-the-art transport, pumping, and storage solutions for multiple industries including: natural gas and oil exploration, chemical, manufacturing, refining operations, construction, municipal, and industrial services. Our equipment goes through a stringent quality care maintenance program ensuring we provide the safest equipment in the industry. Global Tank is a Stinson Industries company with locations in Kansas City, KS; Houston, TX; Alvarado, TX; Chicago, IL; Charlotte, NC; and Philadelphia, PA. Global Tank prides itself on building long lasting relationships by providing loyalty, honesty, and the best customer service in the industry.
